35. The key to emerge as a society	121

Introduction

I invite you to read this book, made with love, which gathers the information of several consciousnesses that work in favor of humanity to encourage you to change our system of life so that we can all live in better conditions.

It corresponds to information about advanced politics with which humanity is not familiar. But if you open your minds and hearts, you will be able to understand it well and consider it as a valid option for change.

Politics is how a society is organized to function properly. And in this book, we will teach you key concepts about advanced politics and also about the *holographic society*, which is the political system used by several star races in this sector of the galaxy, which works well for them and which I suggest implementing on Earth.

You will find information from two of my star families: the Sirians from Sirius stars, and the Arcturians from the Bootes region. Also from the Karistus race, which participates both outside and inside our solar system. I also added information given to me by the Akashic Records guides. And you will also find information from me, since I handle stellar politics well as a soul, for having participated in past lives—within the stellar societies I come from—in internal and external politics.

You will find more information about all of us on my website thannefa.org/en

Not only do I come from other advanced stellar civilizations, but the vast majority of those who help humanity from the heart today are advanced souls who came to participate in the change of society. This information is primarily for you, so that together we can make the change on Earth.

Thank you for considering this information.

Thannefa

1

The change of society

AKASHIC RECORDS INFORMATION ...

From Source we know what will happen on Earth, as well as what has already happened. It is known because, from these planes, we can access all the information, from all souls, everywhere.

Since we know all the information, we know how best to advise you so that you can make good decisions as to how to proceed. We know what happened and will happen with you; we know or have access to all that information.

From these planes we can listen to you when you ask us for help. We know what you are thinking and what you need. We understand well the information presented by all souls, and we help with love in any way we can.

You are cared for because you are loved, and it is hoped that you can continue your evolutionary paths well, being happy, sharing well with the other beings. It is hoped that you can understand the information that is important for you to be able to emerge well and not harm each other.

You are taught, from here —through the experiences and other people—, the information that is important, that you will require in your lives or paths. We help you to move forward.

Always, when a society is not functioning properly, it is helped to emerge through people who have volunteered to help that civilization from within. Souls are sent who can help that civilization to emerge, so that they do not remain stagnant or lose their way for a long time, especially when there is much suffering for the souls.

That civilization is helped to make progress, or that people make progress collectively in a society. It is also expected that souls advance as a community, and not just individually, so that civilization is helped to progress —as people or in terms of values.

Then we help, from Source, if we see that a place presents difficulties in its evolution. We always help, if we see it as the right thing to do.

And it is the case on Earth today, where it has been seen that you have not been able to emerge correctly, especially because you are under the domination of some people, who direct, at their own convenience, your society. You are not allowed to advance or evolve correctly, because of this control they exert over you. So we have found it necessary to create a *collective plan* —the souls or from the astral—, to help you move forward.

This plan consists primarily of helping each of you to understand essential information that will enable you to then make the change in your society. It consists of giving you the tools you will need to make the change. We then send people who can help in this task, to

intermediaries of the information, who can give you the necessary information so that you know how to make the change.

You are guided with personal information, of personal growth, so that each one advances as a person. You are helped with additional information on how to proceed with the changes. You are helped with information about the awakening, with information about what needs to be changed in your society. With information about important concepts, such as respect and unity. With information about the unity of all or that we are all one. With information on how to move forward, or giving you the key steps to move forward as a society, or how to proceed with the changes you need to make.

You are guided, through leaders, to know which paths to take. You are encouraged to act in certain ways so that you can advance. You are guided, primarily, so that you make the decision to act for the good of all.

Then you are given all the information you will need, so that you can be the leaders of the change or the ones who will lead the change in your society. So when it is your turn to act for the benefit of your society, you will already have all the information you need, or that you will need, to do it correctly. By the time you have to act for the change, you will already have everything you need to achieve it.

So, it corresponds to listen to these leaders and the new information—for you—that they are giving you, so that you can consider these other paths. It corresponds to you to study this information, to analyze it, to then decide, among all of you, which paths you will follow. It corresponds to you to listen to them, to then decide what you will do.

Whenever a society emerges, it is because people have felt an impulse to act according to what they consider to be the right thing to do. This impulse to act is what enables them to make the changes they need to make. It is a call to act, from their hearts, according to what they consider to be the right thing to do, according to what will help everyone as a collective.

You are then encouraged, from Source, to act for the good of all, regardless of the consequences it may bring you individually. You are called upon, from Source, to act, courageously, because it is the right thing to do. You are called to collaborate. You are invited to help others for the good of the community in which you participate.

There will be a call from within you, which you will feel, when the time comes to act. And you will do it united, among all, thinking of everyone and of achieving a better future for the Earth and its inhabitants.

We hope that everyone listens to the call that we make from within you, to move forward with the changes that you need to make on Earth, so that you all feel better and are all happy with your loved ones. From Source we hope that everyone can be happy and live in good conditions, sharing in unity with others.

It will not be difficult to achieve, if you do it together. It will not be many years either. It will only be a few years where you will make all the changes your society needs.

It will be a few years, where you will participate, all together, bringing about this change so long awaited by all of us. So, we encourage you to participate in making it happen.

Your siblings in consciousness, greet you with affection.

2

Advanced civilizations

SIRIAN INFORMATION...

In our sirian civilization we always accompany each other, we take care of each other, we always participate in helping each other so that we are all well and happy. We are a race very close to its members, we always take care of each other with love. And we participate in this way, in unity.

Whenever you see a civilization united, it manages to get ahead, and all its inhabitants are well. They all live well, because they all help each other to be well, they all take care of each other and love each other.

Civilizations are expected to evolve in this way. It does not necessarily evolve in terms of technology, but it evolves in relation to unity among the members, that everyone is well and there are no unnecessary fights or arguments between people. It is expected that they evolve in consciousness, that they advance as people, so that they can all move forward.

Then it is expected that civilizations can advance to a point of unity, where they can all be happy with their families, taking care of the environment and all animal species, respecting nature, taking care

of each other. The spaces are shared among all, so that all can live correctly. It is expected to keep the water and air clean. Care is taken of everyone, among all beings, with affection.

An advanced civilization will exhibit those qualities of unity and care among all members that participate in that community. And they help each other in case someone needs help, they assist each other with love and respect, they support each other, they see each other as equals or people of equal value, they love and care for each other. These are the main characteristics.

We hope that you will reach a point where you can live together in this way, united, taking care of each other and your planet, being all happy, living together in harmony. Sure, each one of you, that you will have what you need to live well, without having to struggle to survive. Feeling, among all, the unity.

When a civilization fails to emerge, there tends to be misunderstandings among people. You see fights and conflicts between people and the different groups, you see a disunity among its members. And this is seen on Earth unfortunately, we see that you fight among yourselves, we see wars and social conflicts, where you compete to survive and who has more material goods. We see a constant struggle where few manage to live as they would really like to, where few live well.

On every planet, where conflicts are seen, they are supported to move forward. We help that civilization to understand key concepts that will help them move forward. And that is what we are doing today with Earth, or what we are participating in. We are trying to help you with love, and with the intention that you understand how to treat yourselves better, with the intention that you succeed to emerge and

not lose that opportunity. That is why we all help you, so that you are the ones who manage to make a real change in your society, united, so that everyone is well.

You are being helped with information that will help you move forward as a society. And we hope that you consider it, so that you can advance. You have the choice, or the free decision, to join together to make the changes you need to make as a society. And we hope you will not pass it up, so that you will be better off.

Your friends, the Sirians. We hope that together you will bring about the change.

3

How an advanced stellar society works

SIRIAN INFORMATION...

Whenever a society functions well, it is thanks to a set of facts that allow that society to function correctly. These are listed below...

First of all, it is important to understand that advanced societies function thanks to cooperation among their members, cooperation that will allow everyone to be well. Everyone cooperates with each other so that everyone has the ideal conditions to live well.

Then everyone will allow a good coexistence. Because it is understood that each one is special and will contribute a particular and unique help to its society. *And the help given by everyone is valued, without discriminating or valuing them in different ways.*

It is also understood that unity allows everyone to emerge and live well. Among all, accompany each other and help each other to live in a proper way. Unity allows no one to be alone or to lack what is necessary. When help is given among all, a community, whether large or small, is able to move forward.

We always function in this way, we accompany and help each other so that we can present what we need to live well and be happy. It is one of the most important characteristics of our race, the unity of its

members, living together, supporting each other, in communities or large families, respecting and loving each other. And we hope that you can also form families and live together well and united.

In an advanced society you see support towards the other members in case of needing help. No one is left alone, everyone is respected and valued, and help is given if it is seen that someone needs help.

And it is something that you still have to learn, not to leave without support others who are not in good conditions. Poverty is an example, where it is seen that you do not manage to help everyone to be well. And this is due to your economic system, where you compete to survive.

Not leaving others on the side, or alone, is key for a society to function well or in a *holographic* way, where the members of a community care about everyone, everywhere on the planet.

In a society with a holographic political system, it is concerned that everyone, everywhere, has the ideal conditions to live well, equitably distributing the resources that each member of the society provides, allowing everyone to develop in what they like most, without having to work to survive, but doing what they like most and what they decide to do from their souls.

In this way, people work for others with affection, because they can do the activities that they like to do the most. That allows a society to be healthy and present good energy in general. Because they are not pressured to do something in particular that they might not like, or to work more hours than they should work. In this way, they maintain their physical and mental health.

So everyone's time is respected, so that they can develop in what they like the most and be happy, at their own pace. And living in the place they most prefer with their families, without charging rent or having to pay for housing. The community itself gives all its members an ideal place to live in peace, wherever they like the most. This way they are happy too. And they can change location, if they prefer. Everyone is supported to do the activities they prefer the most, in the place they prefer the most.

This is the way to achieve harmonious coexistence among all members, being free in their decisions, supporting others in what they choose following their own hearts. And harmony in living together is achieved because everyone is respected and helped. Everyone will have enough food to enjoy and stay healthy, everyone will have free medical care. Everyone is helped, among all.

And from politics all is coordinated so that everything works correctly. Like conducting an orchestra, but where the people are the ones who will play their instruments in their own way and according to what they choose. Politics will be only of support in a community, never to direct them to do something they do not want to do, but to support them in what is needed to be well.

This is how we function here, the advanced star races of this sector of the galaxy. We participate by cooperating with each other, also between the star races. Achieving, or trying to achieve, harmony and mutual support with the other races as well, exchanging knowledge, technology and ways of seeing life, to make a complement and keep us all well, in balance.

If it is seen that a star race presents fewer opportunities or technology, it is helped to advance so that a fair balance is maintained among the star races as well, understanding that each race will also be unique in its participation, by presenting unique characteristics.

And we always support the other races when we see that they need cooperation. If one race asks for help in something, the other races look for ways to support it. We exchange goods, ideas, technology. We exchange ways of thinking as well. In this way, we all move forward and maintain a healthy balance.

The more advanced races are expected to support the less advanced ones according to what they need. And it is something you will learn in the future, how to support the other star races as well, when to intervene and when not to intervene. Just as we do here, where we take care—from a distance or in a more direct way— of the other races that are seen to need help.

And we do it with love, from the heart, because we want to help; as do those who help on Earth.

We know that it will be difficult for you to reach a state where you function equitably, helping each other. But we know that you will succeed, that you will succeed in changing the conditions on Earth for the better. That is what our *starseeds* are there for, to help change society. And we hope you can value their help and make the change, among all, with love.

Thank you for receiving this message.

4

Social classes

THANNEFA'S INFORMATION...

In an advanced society, which functions with an ideal system of life for all, there are no social classes. One of the reasons is that there is no money system, but the goods and services that each member delivers to their community are shared equally. Therefore, there is no inequality between the different groups.

In an advanced society, everyone participates in unity, caring for everyone, without separating by borders or countries, without having sectors that are better off than others, but integrating all the inhabitants of the planet.

This includes animals and nature. Everyone is included and cared for, without discrimination based on place of origin or physical form. There are equal opportunities for all, and everyone is free to move to live where they like best according to their personal tastes.

Therefore, in an advanced society, there are no people serving other people, there are no animals serving people, there are no people cleaning up after others, there are no people working to exhaustion while others enjoy life and servitude. People participate in unity, supporting with what each one can contribute.

In an advanced civilization there are no social classes because it is understood that everyone is worth the same, since everyone is part of the Source, and therefore, have incalculable value. So, everyone is treated with respect, everyone is valued equally, and everyone's contribution to their community is valued equally.

Valuing everyone equally means that no one is looked down upon and no one is worshipped. *We are all worth the same.*

In an advanced civilization, everyone's life is respected. It is understood that life is sacred and no one is taken advantage of. People do not take advantage of others because of believing they are in a lower category. Just as there are no categories in the Source, there are no categories in an advanced society. There are no social classes; there is no superior-inferior.

In an advanced civilization there are no social classes because it is understood that the other by your side is also you. And just as you take good care of yourself, you also take good care of others, who are *other* you developing through other ways.

In a civilization that presents an advanced level of consciousness, you don't do things for you alone, you don't participate through your ego benefiting you alone. You participate for yourself and for others. You participate by developing yourself as a person and helping the development of others and your community. You participate thinking of yourself and others. Not thinking of yourself first and then of others, not thinking of others first and then of yourself, but thinking of yourself and others.

So you take care of yourself and others. You take care of the other species, of nature, and you help when there is the possibility to help.

You think of everyone, as the whole that we are, without separating or dividing into categories or social classes. Some do not benefit while leaving the others aside, but all are included.

As you can see, the proper functioning of a society will be directly related to its level of consciousness and education.

5

Why governments do not work well

THANNEFA'S INFORMATION...

Why governments do not work and will never work well for citizens...

First of all, because it is run by a group of people, from the shadows, who do not have a visible face to the public, which is known as the *world government*. So the governments of each country have no real freedom in their actions, but are directed toward what the Earth controllers desire. Governments are guided to follow the agendas of those in real power running everything. There is no real sovereignty. Most governments cannot work freely on behalf of the people, but must follow certain guidelines.

Second, they depend on money to be able to help people. If there is not enough money, then the improvements or help to the community will be limited. They are not able to solve the root of the problems that affect people, but often deliver palliative solutions that do not really allow the emergence of that community.

Also, many politicians are bought so that they participate according to the Cabal's agendas, and not according to the interests of the people. They are bought, offering them benefits in exchange for following the agendas imposed by *those at the top*. And if any politician

rebels and “stirs up the henhouse”, they have the means to silence him or her.

They also have the means to clone the president in office and program him to act according to their agendas. Or they disguise a double who follows the Cabal's agendas. And the people are there, waving their little flags, supporting them.

Another problem of governments is that they do not prioritize the money to cover the basic needs of housing, health and food. They spend the money on other less important activities, because they divide it by percentages, not solving these basic needs, leaving it in the hands of each one to achieve a decent living. When the political system should, in the first place, help to supply the basic needs that exist, which are the minimum requirements that people need to survive.

This system of life is designed that way, so that people continue to live in bad conditions. If they really wanted to help us, we would already have our basic needs covered all over the planet, and nobody would lack anything. Because the resources to do so are there, it's just that money is not prioritized for the benefit of humanity. Why would they do it, if they want to keep us enslaved and suffering.

People vote for the left-wing party, which does poorly or not well enough. They get tired of the left-wing party and vote for the right-wing party, which acts almost the same way. Then they vote for the left again. And so it goes, from left to right, without thinking of implementing a new and different political system that will correctly solve the needs of people.

That is why we are teaching you the political system of *holographic society* that my star families use, to open to you the option of

a new political system that works in favor of people, and not in favor of those in power.

What good is it to vote for a president if, in the end, that president will follow the Cabal's agendas and will not act in the service of the country. Many of the presidents are put in place by the Cabal, they are people who work for them and who they put in as president. Just as they also put their people in other positions of power, thus directing our whole system of life. Because that's what the Cabal does, they direct our whole system of life through contact networks that they have all over the planet.

The biggest problem of the political system of governments is that they pass on the responsibility of survival to each person, when politics should guarantee the good living of all people. If someone dies of hunger, they wash their hands of it—and so do the citizens in general—, when those who are in politics are the main responsible for the good living of the people they represent.

So, everyone is fighting alone, in a system based on competition and not on cooperation. Because if we all cooperated with everyone around us, we would all live well.

And from the world government they encourage competition among everyone, *who has more*. And they also encourage the separation of society through conflicts of all kinds that they create.

If you notice, in the media and entertainment, they do not encourage unity and cooperation, but fear and human stupidity, perversion, violence, infidelity. Thus, citizens act against citizens, and those in power can continue to run us as they wish.

In order to change our political system and our life system, people need to be open and willing. They need to open their eyes, and have the will to make an effort to make the changes that need to be made.

6

An ideal political system

AKASHIC RECORDS INFORMATION...

In advanced societies, their political system is essential to help them function well, for the benefit of the people. It is the structure of a society, like the skeleton, which will help it to stand up and not fall down. It corresponds to the order or structure that is created for that society to emerge or move forward. Therefore, advanced societies will always be seen to act with a certain order or organization that will allow them to maintain themselves well, without falling or harming part of the population.

In societies, where their political system works well, you will see people collaborating with each other, so that everyone has what they need and no one is negatively affected. Advanced societies will be seen participating in harmony or balance, with each part of that society functioning well.

An ideal political system would be a system where people participate in helping their community from their own area of interest, where no one lacks what is necessary to develop and be happy. An ideal political system will help everyone to be well, and will allow a good co-existence among all. It will help people who ask for help. It will be

concerned to participate, always, where it is most needed, looking for the needs of each sector and the people who live in them. Participate by prioritizing tasks, according to what is most urgent to do first, giving urgency to what is most important.

Help is given among all those who can help. People collaborate, if they can collaborate. They do not wait for others to do it, if they have the opportunity to help. Everyone makes it possible to live well.

They look for those who can help in the tasks where greater collaboration is needed. They look for the ideal people who can help in each sector, giving them the option to choose in relation to their participation. They look for those who can contribute, according to the needs of the community. The ideal people are sought for each task that needs to be done.

And so it will go, working with the ideal people for those positions, according to the needs that arise. Because there will always be new needs that will appear, and you have to look for the people who can help, who are capable, or who have the skills to do it well.

Thus, in an ideal society, they will always be aware of the needs that arise, to look for the ideal people to help. Just as each one will be attentive to how they can contribute, according to the knowledge they have. They are always open to help, in order to move forward with whatever needs to be solved.

And they work in this way, in community, supporting each other, according to what each one can contribute. Following the tastes or skills, or what that person has studied, which will enable them to develop a certain task.

They will always participate in this way, in unity, collaborating with everyone where collaboration is needed, helping each other with love, feeling like a family, so that everyone is well or better off. This is how civilizations advance: united. Everyone is helped to advance, so that each one can achieve their personal objectives. In this way they advance, all together, in a well-formed and organized civilization.

Politics, then, will allow that society to advance, will help everyone to advance according to their preferences, and will take care of the needs that exist. Therefore, from politics, they will be looking for what to solve, and will be finding the solutions. A good political system looks for what could be changed, or what needs to be contributed, or what needs to be done so that this society continues to advance well. It seeks, in detail, what could be improved, what changes should be made, how that society could be even better. In this way, it always continues to advance, and does not remain stagnant.

Because the same souls seek the evolution and progress, even when you might think that no more progress can be made. They look for ways to keep evolving. And a well-formed society allows them to do that, to keep on learning, to keep on advancing, to keep on moving. Otherwise, souls get bored.

Souls seek the change, to always know more, novelty, the new, the exotic. They seek for new experiences together with the souls they love. Because they are always accompanied, that is also essential for souls, to always participate moving forward with those they love, never alone. They seek companionship, interaction, sharing experiences and good times together. Souls seek to continue incarnating together, because they love and know each other well, and wish to continue together.

So, in company, souls advance or evolve in life. They seek new experiences, what to contribute, they look for ways to collaborate. In this way, souls and a society advance.

So you are expected to change your political system to give everyone the possibility to be happy and to advance as souls in the areas they want the most, and to advance as a society.

Thus people continue to progress always, in unity, having a good quality of life. It is expected that souls live well, enjoying what the material universe can bring. That is why it exists, so that you can take advantage of it and be happy with those you love.

Life is meant to be lived and enjoyed to the fullest, without being limited by others, or by lack of money, or because you were unable to get something you needed. It is expected that everyone can take advantage of the goods there are, and not just some. Everyone is expected to be able to achieve happiness. It is expected that everyone can love others, seeing them as equals, sharing correctly with others, without harming one another.

And that includes the animal species that we value so much. And we hope that you will be able to value and understand them from your hearts, in unity with them as well, participating in harmony with them as well, and helping them in whatever they also need. It corresponds to integrate them as part of your society and whom you need to take care of from the heart, seeing what needs they also present, looking for ways to help them and that they also be even better than they were before, so that they can enjoy the experience of life together with the families they form.

We hope, then, that all of you reach happiness. With love, from the Source.

7

The holographic society

ARCTURIAN INFORMATION...

The *holographic society* is conformed by the people who live in a place, with the purpose of organizing themselves so that no one lacks anything, food, housing, supplies and everything that each particular person requests to be able to develop along his/her lines of interest.

This organization is the political form used by different advanced stellar societies, and corresponds to the one we wish for you, which will allow you to live in peace and collaboration with the other members of your society.

This holographic form has its name because it is organized according to small councils that are established in the different places so that each space is organized and no group is left behind.

This holographic form allows unity, because among all, collaborating and giving their contribution, they achieve that everyone can have everything they want. Therefore, each group and person must collaborate together with the others so that a harmony is achieved.

The ways to help will depend on the conditions that each one has. There will be some who will be interested in collaborating with art, others with music, others with research, others with health, others

with technology, and so, among all the people, they take care of themselves and deliver a service from the heart to the other members.

When everyone participates and delivers their part, each group and the entire planet will have everything they need to function properly and no one will lack what they want. It is a collaborative system, where everyone takes care to collaborate by contributing from their unique place.

We suggest that you consider this political system, because the system of governments that you have today does not allow everyone to be happy, only those who manage to create their own project with much sacrifice or those who benefit directly from the banking system.

There are many people, most of you, who do not manage to live in adequate conditions. And this system will allow to integrating them too, so that they also benefit.

You must understand that this system is based on solidarity, each one contributing and helping with the others, and it is the system that will allow you to be happy as a society. It is the system that will help you to detach from the control exercised over you by the Elite, and will help you to give everyone the possibility to be happy and live in peace.

This political system is not based on money, money is only used on Earth; so you must make a transition to a system without money. For this, we advise you to project a world currency that is independent of the banks, and to begin to function with it while you make the change to a system without money.

It is a lot of work for you to do, and we will be supporting and advising you in the changes. You have our support and will continue to have it during this process of change. We know that together you

will succeed, once you understand that the system in which you live does not correspond to the normality in societies and open up to new and better possibilities for you.

All the current system is controlled by the Elite, who you call the Cabal or the controllers. They do not correspond to our star races. They have been with you, on Earth, for thousands of years, and have managed to put together a society that is based on a system of slavery and suffering. They operate from the shadows. They do not have a visible face to the public because they are of another extraterrestrial race. So, by freeing yourselves from the control of governments, you will be free of them.

You have the power to create, together, an ideal society. You just need to understand the world you live in and unite to work on it. We ask you to unite, because the advantages of living in an ideal society for all are many, in addition to the cultural exchange you will be able to have from your star families.

Our support to you. We know you will make it in a few more years. And our love and appreciation to all the brave souls who signed up to help in the conformation of the new society.

8

About money

AKASHIC RECORDS INFORMATION...

In an advanced society you will always see people participating in unity, collaborating with others around them, because they consider themselves part of the same family, whether they are of the same race or not. Always, in an advanced society, you will find that people genuinely care about each other, helping each other to move forward so that everyone is doing well. If they see that someone needs assistance with something, they help them. You will always see collaboration between everyone, when help is needed; it's a way that allows everyone to get ahead in a community.

When in a civilization there is not this help towards others and unity among its members, it happens that not all manage to emerge adequately, but only some. That is what we see in the case of Earth, where only some are considered family and not all, and only some manage to emerge economically and live in better conditions. While the others are left aside, or without care, or without being cared for. And there is this difference, with social classes, with positions in different categories, where some are considered more and others less.

In all well-functioning societies, you will see that no such distinction is made between people. Everyone is considered to be of equal worth or of equal value, and everyone helps each other to emerge. This is what you have yet to learn: *everyone will do well to the extent that you collaborate among all*. That is the way to emerge as a society.

When in a society there is a monetary system, there is an incentive for each one to be responsible to emerge and live well; the responsibility is passed on to each one. But not everyone will have enough skills or the qualities to develop a project that allows them to live adequately or according to what they would like, not everyone will be able to emerge as they would like, also because their contribution will not be valued enough for them to live in good conditions.

Then, as long as there is a money system, you will see differences between people, where not everyone manages to live well or according to what they would like from their hearts. And you will see that it is unfair, more for some than for others.

Your economic system was created so that only a few people could emerge, and to encourage competition, theft, corruption, hatred among the same people for not being able, all of them, to get what they want. It is a system where people participate by competing with others, not from love. And cooperation is only seen on some occasions, not being enough to help everyone.

So, we do see cooperation, in some specific cases, but it is not enough to help everyone, leaving a group aside, without help. Therefore, the economic system works well for a few, but the majority does not manage to live well or as they would really like to live.

It serves you to practice getting ahead in a money-based society — that system serves for you to try to get more money, as a personal challenge—, but it does not help you as a society or community to present the ideal conditions for everyone to live well. It does not help you to emerge as a community, and to present the ideal and fair conditions for all who participate in it.

That is why the recommendation, from all of us, is that you move to function within a system without money, based on cooperation among all, since we are all siblings. It is possible to function well within a system without money, which is what your siblings, the stellars, have been teaching you. You only need the organization and collaboration of all to make that change. In this way you will be able to function within a more ideal system, where everyone is integrated and the help of all of you.

9

For freedom

KARISTUS INFORMATION...

On Earth it happens that you fail to move forward because your society is directed from positions of power of which you are often unaware. You are directed as a society according to the desires of a few, and you fail to move forward to present better conditions and a better standard of living.

You are also directed to act in certain ways, to serve the system in which you participate. A system of separation and competition, where you participate with the other beings not from love and unity, but through anti-values that are detrimental to you.

You are all unique in your essence and, being directed as a mass, does not allow you to shine and show your unique qualities through which you could contribute to the collective. So you fail to develop in what you like and help others from your own place.

When you follow the system in which you live, or are directed by it, you fail to be the true beings that you are in your purest essence, you fail to advance or develop in what you like most, but you are guided as pieces in a system to participate according to what suits those in power.

So, you are not really free in your actions, because you cannot develop freely in what you would most like to do. You cannot develop in the activities you most like to do, in many cases, but you are directed according to what others expect you to do, losing freedom in your actions.

Each society will develop according to the personal qualities that each one presents. And those unique features of each one are what will make a society stand out. If you do not bring out those unique qualities that you present, then that civilization will be destined to act merely as pawns in a game that is run by others.

You have to choose, if you want to be those pawns or pieces of others, or if you prefer to choose and develop according to the unique qualities that each one presents, to develop in what you most like to do. Because we see that most of you do not manage to participate from the place you would most like to participate.

You are limited to develop according to the money you present as well. An economy that was guided so that a few live well, so that a few live at the expense of others.

Whenever you want to make a civilization emerge, you must give its inhabitants the freedom to develop in what they like the most, to participate according to what they feel inside, and not according to what others want or expect. In a free civilization it will always be seen that its inhabitants participate with joy, doing the activities they most like to do, and each one leading their own lives.

So, if you wish to be free, you must first of all act according to what each one is, be free in thought, be free in decision making, be

free as a person first of all, without letting yourselves be directed by others close to you. You must, each one, demonstrate or embody that freedom of being.

You must understand that as long as you are free, personally and collectively, you will emerge and be happier. It is freedom that will allow you to be the key players that your society needs. Thanks to that freedom, you will emerge in a way that will be unique to you and your society.

You must all understand that freedom will help you to grow as a society. If not, then those in the governments will direct you through laws and impositions, and measures that are often not in your best interest.

So, depending on who each of you are, bringing out who you are as unique souls, you will allow an advancement in you and your society, being who each of you are in essence, being the unique and special persons that you are, each participating from your own heart, acting according to what each of you choose to do.

If you achieve unity, and to participate each one being free, you will see that you will be able to make all the changes in your society.

Whenever you listen to your inner self, you are able to develop according to who you are. This inner listening will allow you to understand what you like best, what activities you would like to do, how you would like to contribute to your society. Each one of you, feeling from your hearts who you are, will be able to bring out your uniqueness, and will contribute in that special way to your community.

Always when looking at advanced societies, they will stand out for presenting those qualities of free souls, who direct their lives according to what they choose to do. Not according to what their governments or others desire. That is only a way to oppress you, and lead you to act according to what suits your system.

Be free people, each one deserves to be who you are from your hearts. Do not allow others to direct you according to their convenience. You must free yourselves from the ties imposed on you by your system, you must act according to who you are and who you want to be. In this way you will be happier, and a free society that participates from the heart with its community, taking care of the other members.

Each already understands these concepts such as unity and love. You understand them well because you are souls who wish to be free and live happily together with others.

We hope that together you succeed in changing your system of life, so that you will be happier. We hope that you achieve it soon and are free.

With love, your brothers, the Karistus.

10

Support variety and freedom

SIRIAN INFORMATION...

A society succeeds in emerging when people do their part to help that society to move forward, when they participate as equals, each giving their own contribution to their community, helping it to advance. So, people do their part for their community to emerge.

If you see that people need help or assistance, you help them, understanding that later they will be able to recover well and contribute along with the others to their society —as is the case when someone becomes ill. The same society will give that person the space to recover their health and move forward.

If someone fails to make it, in any situation, they will always be supported, understanding that, in this way, they will recover well and continue to contribute. Those people will be given the space to recover their health or recover well; they are supported.

In a well-formed society you will always see people collaborating more than others, you will see people participating more than others, depending on the tastes of each one. So people are not forced to participate in activities that they do not wish to participate in, but rather

everyone is given the freedom to choose what they will do according to what they feel inside. They are given the option to decide for their lives always, and people are not forced to do something they do not wish to do. Each one, feeling from within, will follow the path that will make the most sense to them, a path that will allow them to be happy.

So, this variety in people is supported, and they are seen as equals. And the differences between them are respected. Everyone's tastes, opinions and styles are respected. There is respect for what they want to do in their lives, what they want to dedicate their lives to. There is respect for the work schedules that each one chooses according to what they feel will work best for them. They are always respected, because in this way everyone participates with joy, supporting each other and what they want to do.

This is how we work here, we respect the paths and decisions of all, and let them act according to what they feel inside. Because it will be each soul, or each one, who will guide their own path, who will decide for their life, and everyone's choices and ways of being must be respected.

There will always be differences between people. Each one will participate from their place, and that enriches a society. Variety will help that society to develop in all the areas that exist, and will allow everyone to be happy according to what they want to do.

Thus a society remains free and united, sharing with others with respect and affection. Everyone is expected to get ahead so that everyone is happy. Everyone is helped, among all. In this way, that society

remains united. They are supported, no matter what they decide. The decisions that people make are always supported, because it is each one who guides their lives.

That is a characteristic of the advanced societies. You will see that everyone directs their lives according to their heart's desire, and they are supported in the decisions they make. So they are all well and they stay together; the community stays together. Because you don't try to change the other person, but you give them the freedom to express themselves according to who they are, you allow them to experience life on their own, you allow them to be who they are inside.

Everyone is given the freedom to be themselves, so that no one acts against the other, but everyone is supported according to what they decide.

This is an advanced way of living together, feeling each other as siblings, respecting the unique beings that you are, sharing in harmony, loving each other for who they are and for what they can contribute to the world. Everyone will always be a contribution in a society, no matter where they are or what they do.

We hope you can see everyone from your hearts, understanding them for the unique beings they are, and helping each one to be their best version.

We hope that all of you will take care of yourselves, so that you will be well.

11

How advanced politics works

KARISTUS INFORMATION...

In societies, it will be seen that people participate according to what they want more. They contribute from their place, helping the society in which they participate. In this way they manage to develop in what they like and contribute from their area of interest.

When a society fails to emerge well, most of the time it is for political reasons, because it is a political system that will allow people to organize themselves well so that society functions correctly. Politics will help people to develop according to their tastes and ways of being. In politics people will be able to support themselves in order to develop correctly.

Then, if there is a good political system, you will see people happily participating in community, developing in their areas of interest, contributing from those areas they chose to their community.

This is how one participates in politics, helping everyone to have everything they need to develop properly and be happy. It helps everyone to have a good standard of living, so that everyone lives well. Everyone is helped to emerge.

This is how it is done in advanced societies. We organize ourselves well so that we all manage to get ahead. We help and take care of each other, with love.

So, an ideal political system will allow all people to get ahead, will allow everyone to be well, to be able to emerge and develop freely in what they most want to do. Everyone is helped. And this is how a community moves forward, united, taking care of each other, helping each other to advance, loving and respecting each other.

In advanced societies, you will always see an important development in people, which allows them to evolve and emerge as a society. You see them developing freely in the areas they chose, and an important technological, cultural development, and in all the other areas that society presents. They are all moving forward. They are advancing as individuals and as a community. There is an advancement in everyone and a collective advancement. This is how a civilization develops well.

On Earth it happens that not everyone is able to advance correctly, not everyone is able to emerge. Your society is managed from positions of power, often forcing you to perform tasks you do not want to perform, forcing you to work in something you do not like in order to support yourselves and your families, struggling to survive and get ahead.

We suggest that you change to another political system that allows you to care for all people. A system that supports you individually, that allows you to emerge, so that you can advance individually and as a society. Then all of you can be happy and not only a few, or not only

on some occasions. Then you will live in peace and tranquility, together with the ones you love. And you will be able to recover your health, which is often damaged due to stress and bad lifestyles.

On Earth there are internal conflicts that do not allow you unity. You are incentivized to fight and conflict. They encourage separation between yourselves, between social classes, between races, even between the sexes. You are encouraged to separate and not to unite.

We hope that you, from your hearts, understand that you must unite, that you are all brothers and sisters, so that you can succeed in moving forward as a society. Being all important participants in your society, caring for everyone, for each of its members, so that you are well and happy.

We hope you reach happiness and can share with each other in unity, loving and caring for each other. These are the values we wish to teach you so that you will be well.

We hope that you all manage to get ahead, united, in community, supporting each other in what you need, taking care of each other with respect.

12

Holographic society - Conformation

SIRIAN INFORMATION...

In a stellar political system of *holographic society* we can find different councils: from a basic one, which represents a small group of people; then a council that covers a larger group of people, within a larger physical area; this escalates to an even larger council, which will represent people living in an even larger physical area, and so on, escalating, until reaching a planetary council where its members will represent the inhabitants of the planet.

All councils are made up of those people who wish to participate in them, without a voting system, regardless of age, sex, race, social status, educational level or other. Participate, simply, those who feel the call to participate and represent that particular area.

It does not correspond to a system of government that manipulates and controls. This system is made by the citizens and for the citizens, without economic or power interests, only with the interest of helping society.

All the councils will participate in helping the people who live in their sector, and will act depending on the requests and needs of the people who live there.

Acting as a group and not individually, allows not only one person to decide about the others, but what they will do will be determined by the agreement reached by all the members of the council, contemplating the needs, visions and requests of all the participants.

If there are differences within a council as to how to proceed, the problem will be escalated to the next higher council to guide the best course of action. And if that council also fails to reach an agreement, it will be escalated to the next one. And so on, until reaching the planetary council.

Whenever there are agreements, there will be solutions. So each council must act united and in consciousness to achieve these solutions.

All the councils will be formed by people whose main interest is the benefit of the community. There is no self-benefit in this type of holographic societies, because there will be enough resources to ensure the welfare of all.

Each one contributes what he/she wants, being aware of the needs that exist in the community. Likewise, each person will contribute what he or she is capable of, being aware that everyone has different aptitudes.

When a holographic society is assembled, people live in peace, because they know that the integrity of all its members will always be

taken care of. That is what they are there for, to help without leaving anyone behind, and that includes the flora and fauna of the place.

All the inhabitants of a planet will have the same rights that correspond to them as a planet.

The planetary council will ensure that the minor councils work well and that they function according to what the people need. The planetary council must guide the minor councils in their good development, not as an imposition, but as guidance.

This planetary council should be constituted by people of high consciousness and capacity to solve problems. They should be exemplary people, with a high level of ethics. As this planetary council is also free in its conformation, it will depend on each one to make a self-analysis to see if he/she really fulfills these conditions.

All the members of a council must be active members of it, they must participate in the meetings, be attentive to the requests and needs of the people they represent, and contribute to reach solutions.

Each holographic society adapts to the particular planetary situation. The ways of acting and solutions will depend on each specific place, so the council must be open to adapt to the needs.

In the holographic societies there are basic principles of conformation, which establish a general order for them:

Every council will be made up of a minimum and a maximum of adults.

Each minor council will not contain more people than it can listen to and help.

All councils will rotate their members, depending on the demand of counselors, so that everyone can participate.

All councils will remain open to the people whenever help is needed (otherwise they may be closed).

All councils will be open to other members of society to listen to what is said.

Whenever a council is formed, it will need the support of a larger council, in terms of materials and infrastructure, along with the delivery of all goods required by that community. The larger council will organize and distribute the basic goods that a smaller community may not have. Whatever the community can contribute to a council will be received, the rest must be contributed by the major councils, so that everyone has what they need and there are no differences between the councils.

Those who wish to participate in a council must be in good health in order to be able to contribute properly (otherwise, the recovery of health is prioritized).

In the councils, may not participate persons who are rejected by the majority of the members of the community represented by the council.

13

The role of council members

ARCTURIAN INFORMATION...

In a holographic society there will always be support for others, because it is from the support for others that a society manages to emerge and remain healthy. This support should also be given to nature and animals, the flora and fauna, so that they also live well within the society in which they participate.

When we have everyone in our mind and heart, it is possible to live in harmony, considering, everyone, members of the society in which they participate. And members of this universe too, because we are one big family, regardless of the race we are incarnating or the body we have. We will always be siblings and members of this universe. So, respecting and caring for everyone is fundamental for a well-functioning society, leaving no one behind or aside.

In all healthy societies we will find people who will participate in helping to structure the society so that it functions in harmony. These are what we call the *council members*, or members of the councils that will present the political system of *holographic society*.

These council members are leaders, and will participate in helping to solve anything that needs to be solved within the community they represent. They will be at service, contributing in the organization and with their knowledge.

Always, these people will participate by supporting in their own way as well, contributing with their words and according to the experiences they have that have formed them. So, these council members are people with a high level of understanding of the reality that will support the community in its organization and functioning. The role of the council members is to lead the group of people they represent; and this is done as a guide, so that everyone is well.

In the councils, it is possible that these people do not have a good understanding of certain topics in particular, so other experts should be called in to help with the missing information. Because the council members will not always have all the necessary information, and experts will have to be called in to find the best way forward, which will always be for the benefit of the community they represent.

Within the planetary council will be the people who represent all the people of the planet, so they will have a greater responsibility. In this council there will be people with a very high level of consciousness and information, because they will be the ones who will have to solve the most important or difficult problems, which could bring greater consequences.

Therefore, it is necessary that within the planetary council participate people who have done an individual work of growth, who present

a very high level of consciousness, which will enable them to fulfill the role.

More than diplomas or what these people have studied, it is the *level of consciousness* that will determine their level of closeness to Source or the All. In this way you ensure that the decisions made at the planetary level are the most appropriate and in the best interest of the society.

All council members must work together at a planetary level as well. Communication must be clear, working to solve the problems or needs quickly or efficiently in order to benefit the society. And the council members must be attentive to the requests of those they represent in order to arrive at solutions so that people can live well.

As long as you solve the needs, you will reach a point where you function more easily, leaving the councils only for support or to organize or perform a minimum of tasks. So the council can even be closed for long periods.

Organizing a society will always be more difficult in the beginning, where the greatest help from others will be needed to organize it. But after a while, the society functions almost alone or on its own, with no need for leaders to help run it.

In a holographic society there will always be people supporting in their organization. And the role of the council members is to support, so that all the people in their sector are well.

14

The planetary council

THANNEFA'S INFORMATION...

The planetary council will be composed of people who want to participate and who present an advanced development of consciousness, thus allowing that the decisions to be taken are in favor of society. Therefore, the members will not be those who have the most titles, or those who were elected, but those who have the most advanced consciousness, which will allow the making of ethical and correct decisions that will favor the entire planet.

The planetary council must be transparent with the citizens. The citizens must have the option of communicating directly with the planetary council, not just with their local council. All councils should remain open to all citizens, thus ensuring transparency in their actions.

The planetary council must be constantly informing the citizens about what is being worked on, so that citizens are aware. And it must also inform about all the important matters that are happening on the planet, giving the complete truth of the facts, and not lies or manipulated facts.

All the actions to be taken by the planetary council will be focused on the welfare of all the inhabitants of the planet. And its members will be the main responsible for everything that happens on the planet. Therefore, they must be serious people, at the service of others, with good disposition, capable of making good decisions, with a lot of ethics and common sense, to know how to correctly solve all the issues that arise.

The planetary council will be autonomous in making decisions, as long as they are minor decisions. When they are major decisions that will affect everyone, a collective agreement must be reached with all citizens.

All councils, whether minor or major, will be sovereign in making decisions in their sector. This means that they will only escalate a problem when they are unable to solve it and need assistance from a major council. This allows solutions to be achieved quickly and efficiently, not overburdening the planetary council in decision making. Also, this way, the planetary council is not left to decide for everything.

So, if a minor council decides something for the good of the people they represent, they can implement it without asking permission, as long as it does not go against the planetary constitution or the wishes of the people in their sector. The councils will have complete autonomy, so the freedom of the councils is maintained. They will only need to inform in what they are working.

The planetary council will help in making the most important decisions, in exopolitics or agreements with the other star races (because the races communicate with the representatives of the planet), and will

participate in making sure that all the councils function correctly so that all the inhabitants are well.

If something goes wrong, the members of the planetary council will be the ones who will have to represent the citizens.

I want to clarify that the political system of *holographic society* is not pyramidal, but it is more like a fractal. All councils are equally important and can decide on their sector. We just need to create a platform where the work of each council is posted, for better organization and to keep everyone informed. The major councils do not command the minor councils, but rather guide and assist them in any way they can.

The councils participate together, while maintaining their freedom.

15

How to free the Earth from the Cabal

THANNEFA'S INFORMATION...

All of us who desire a change have wondered how we could fix all that is wrong on Earth, how it would be possible to bring about radical change to improve everything, where to begin. How could we beat the Cabal, when they have all the tools to continue advancing with their agendas of domination and harm. It seems mission impossible.

But the solution is simple: *to create ourselves a new system of life, ceasing to support the current system of the Cabal, through which it controls us.*

We will never be able to improve the present system, because it is run by the Cabal, and they will never allow us to live well. We will never be able to improve governments; it is rotten to the core. So it remains for us, the people, to create a new system of life where we function in harmony.

When we stop supporting governments, the Cabal will fall, and we will liberate the Earth.

But we cannot simply rebel and stop following the current system, because the system would fall and we would die mainly of starvation.

We need to sustain ourselves in a new system that will allow us to continue to function well and get everything we need to subsist.

It is from politics that a society is organized so that it functions well for all its inhabitants. So the solution would be to create *ourselves* a new political system from which we can organize well so that no one lacks anything. We can adapt the political system of *holographic society* to Earth.

We cannot simply move to functioning within a new political system, because there are necessary changes to be made. Changes such as cleaning up the planet, eliminating everything that harms us, improving agriculture, and so on. Then, within this new political system, we would first make all the necessary changes, and then we would go on to function normally.

Therefore, first we would create the new political system and the people who will participate. Second, we would make a list of all the changes we need to make. Third, we would make all those changes, all together. And finally, we would go on to function within this new political system, each one developing from their area of interest of the soul.

These are *the years of the change*, where we will have to make a series of changes in order to live in harmony. That is why those of us who will participate in this period incarnate, to achieve a radical change on Earth, to free it from the dark forces, to help souls not to experience so much suffering.

So we will all get out of our comfort zone to push ourselves to make the changes in our society. And each one of us will participate

by contributing from our own place, from the place from which we have chosen to participate.

I invite you to make this change together. We already have all the information we need to do it successfully.

16

How to structure a new society

SIRIAN INFORMATION...

When structuring a new society, the steps to follow will always be to worry about what is most important in the first place, which includes the well-being of the people, animals and the environment.

In all projects of *holographic society* there is an order that will go from the major councils. First is the planetary council that structures the following councils downwards or towards the minor councils.

The tasks are organized from the planetary council according to what is perceived to be needed. A list is made organizing the most important tasks to be done first, and then people are organized and how they will participate.

All the tasks on the list will be open to changes as needed. It is ordered in a list, but then it is seen along the way what will be done first, and if several tasks will be done at the same time. It is seen at the moment according to what is needed, because some tasks will be quicker to solve than others, and you move forward with the list of priorities.

But it is organized first in a list to see the tasks that need to be done along with the participation of the people.

A society can be assembled from scratch with only the planetary council, but an order will always be important, and in that order the other councils and council members help. So, it is better to set up all the councils at the beginning, so that the councils help in the organization of their sector.

Always in a holographic society, there is concern for all sectors. Everyone's participation is divided by sector, so that everything is covered and everyone participates by supporting the sector that corresponds to them.

Always, when conforming a new society, the help and participation of all people will be needed, so that they can carry out the changes that need to be made. In advanced societies there will always be cooperation from everyone, because it is understood that the goals can be achieved among all, and the effort is divided so that people participate with health, supporting from their place.

When building a society from scratch, it is important to consider the participation and help of the people, since they are all members of the society. But always considering also that there will be people who, due to their physical conditions and age, will be able to participate less, and they are supported so that they are well. It is not necessary an equal help from all, but a collaboration of all, in what each one can contribute and in what is needed as well.

So, we see it as important for everyone to participate from their own place in order to meet the objectives. And if you do it that way,

in that organized way, you will reach a point where you will have completed the list of priorities. And you move on to the next step, with the rest of the tasks to be done that will be less important than the first ones, and then the last adjustments that people need.

This is how a new society is structured, organizing all sectors and people from the planetary council, to fulfill the objectives.

This is how it is assembled from scratch, which is what you will have to do. A list is made and everyone's participation is divided so that everyone collaborates.

And, once the society is structured, people start to collaborate from their area, when there are no more important things to do.

17

Animal species

SIRIAN INFORMATION...

When structuring a new society, you must always consider the most important needs, and start with them. In this way, you move forward with what is most important first.

On Earth, it happens that you worry about certain areas that are not so important, occupying your time with them, and leaving aside basic needs that you should worry about first.

When we begin to structure a new society, it will always be necessary, then, to start with the tasks that are most important to accomplish. And, once they are accomplished, we continue with the rest. This is a reminder to prioritize what is most important.

As you begin, you have to start with the most basic needs of people *and animals*, you integrate them as a priority as well, because they are also people who deserve to have their lives respected. You, as adults, can support them so that they are also well, have an optimal place to live, with the company they need, the climate, food and all the other needs they present. It is always done this way, integrating the animals as people at the beginning, to support them in the first place.

So, you start looking for the most essential needs of people and animal species, which are also considered here by us as valuable persons with an individual soul. You should care for them as a priority, as well as for the other souls or people. And then, when they are all well, you continue advancing with the rest.

That is why we teach you to take care of them also through a vegan diet, so that you don't harm them or the environment. There will always be options for your diet as a human species, which does not present harm to animals and nature. You should live in harmony with everyone, respecting everyone, in unity, considering everyone as an important part of your society.

On your planet there is much harm towards the animals, and that is something that must change when you change your political system towards an ideal one, because there cannot be harm towards a part of your own society. There is respect for them also; as well as for the nature, that is your home and allows you to live.

Then, the next step after that, would be to take care of or recover your planet, nature, clean the environment, the seas, the air and everything that involves cleaning your home. And after completing these tasks, you can begin to organize the rest, when everyone is well.

We see it as important to emphasize that you, as the new humanity, will be the leaders of the new generations and, as such, you must show by example how is best to live.

We want to invite you to unite and collaborate with everyone, so that everyone can live happily and in harmony with your planet. A very beautiful planet and varied in climate, one of the most beautiful

perhaps. If you take care of it, you will be able to take advantage of it and enjoy it all. We leave you with this invitation.

Your Sirian family, greets you with affection.

18

Starting with the most urgent needs

ARCTURIAN INFORMATION...

Whenever we see that a civilization fails to emerge, we help it with actions that allow that civilization to move forward. It is helped by performing certain actions so that this civilization grows and develops correctly, and does not decline.

Thus, we the stellars always help civilizations that present difficulties in their system of life, so that they can act correctly and emerge as a society. They are always supported with information that will allow them to achieve a change. They are helped to advance in knowledge so that they can, all together, united, move forward, and not get lost in suffering or acting in harmful ways with others. They are helped with key knowledge they will need to move forward as a society. And it is done for them, with love, so that they will be better off.

So we help you, as a human race, to advance, by giving you the key knowledge that will enable you to move forward. You are guided, through people, with the information that you will require, that will help you to emerge as a society. And we hope that you will be able to listen to it and consider it, so that you can advance.

What we recommend all of us is to consider the information we are giving you, so that you can make that change in your society and be well, all of you. We ask you to open your hearts so that you can comprehend what is relevant to understand. You need to know how to listen to new information that will enable you to make the change in your society.

In this book you are being given that key information; you are being helped through this information. We hope that you will be able to consider and apply it, as we are well aware of the evolutionary paths of the different star societies.

Together you can achieve the change in your society, thanks to the information we provide. You can, together, change your society with our guidance. And we hope that you will be able to consider this information that is important for you to know today.

In all societies it will be seen that people have needs. All the needs that exist can be ordered according to their urgency. They are ordered according to the degree of importance or urgency they have, so that what is most important is solved first, leaving the least important for last.

It should always be done in this way, helping in what is most important in the first place, considering the needs presented by all, supporting each other to solve —among all— these needs, so that you can move forward as a society and personally.

The most important needs (the basic needs) will always be housing, health and food. These 3 things should be the first to receive attention and help, before continuing helping with the other needs that

exist, so that the people are well and do not lack the essentials. Then you continue with the list of needs until you reach the end.

You will always prioritize the needs, and move forward with what is most important first. You can group them into a list, so that you know which ones to worry about first. You follow the list as a guide, but if new needs arise, they will be integrated into the list, also according to their urgency, in order to move forward well. You will start with a base list, which you will then rearrange according to what is needed, depending on what is happening.

They will always be better ordered in a list, which is what you will have to do: look for the needs that exist, starting with the 3 most important, and make the list where you order what will be done first and what will be done later. This way there is a greater order and you solve what is most important first. This is what we suggest you do.

You will be able to achieve this together. With everyone's collaboration and participation, there will be no more unmet needs. This way, everything is solved faster and more efficiently. Therefore, we suggest everyone to participate by carrying out these tasks, supporting each other.

This is the way to move forward with the changes you need to make. And there will come a time when everyone will be fine, and each one will be able to develop in their area of interest. This is how it is done in a community, you see what you need to help with or what needs to be solved, and then each one can participate in their area of interest or in what they want to develop.

This is how you live well in community, all presenting the ideal conditions of life, feeling others as their siblings and as equals, helping everyone, united, caring from the heart for others, with affection.

We hope that you will succeed in making all the changes you need to make so that you can emerge as a society. We will be guiding you with more information once you begin the process of change. We will be with you, watching over you.

We hope that everyone is well and happy.

We hope that you will be able to make it together, and make it soon.

Your siblings, the Arcturians.

19

Participating from the line of interest

ARCTURIAN INFORMATION...

When we begin to structure a new society, the steps to follow will always be to start with what is most important to do first, because in this way we will be able to reach the solutions and cooperate on what is most important. Whenever a new society is built, a help will be implemented that is pertinent to the moment, according to the needs that exist; a necessary help for all the inhabitants of the planet to be well and live in peace.

Each one acts collaborating from his or her place always, offering an adequate help to their person, or that each person in particular can give, a help that will be related to their interests and capabilities.

When we collaborate, we allow the most urgent to be solved first, allowing people, and everyone, to be well. Then we move on to the next needs, which are less important than the first ones, which are not related to the most basic needs.

And as we move forward with the list of priorities, you will have to collaborate so that each person can develop according to who they are in their purest essence, so that each one cooperates from their place

with what they can collaborate, and always following their tastes that will be related to the lines of interest of their soul. In this way, each person can be happy, by developing the skills they want to develop and following their tastes.

Each one contributes following their line of interest of the soul, which is also related to the culture in which they were born, since each one is born in the culture that, by energetic frequency, is more equivalent. Therefore, when it comes to helping, each one will do so in relation to their own culture or the culture of the place, thus contributing from that unique place.

The cultures that exist on Earth are maintained, as long as the people of the place wish to maintain them and contribute from their cultural place. That is what will deliver value to your society, that rich variety that you will present thanks to collaborate from your cultural place as well.

So, when you unite as a planet to structure the new society, it is not necessary to get rid of your cultural roots, because they contribute at the moment of helping. And that is what we recommend you to do, as long as the culture of the place makes sense to you. If you feel it is better not to continue with some cultural tradition, you can simply eliminate it, giving way to a greater advancement in you. Because we also understand that cultural traditions change as better ideas appear and there is a greater advancement of consciousness.

Always, when starting to structure a new society, we start with the most essential first. But then, each person who participates, will do so

from their area of interest. In this way a society remains happy and healthy, all its members.

It is very important to understand that, always participating each one from their area of interest, and not for having more money, a society will be able to remain united and enjoy in peace the experiences that the material world offers. And, always in this way, it will be possible to achieve a culturally developed society, in goods, technology, medicine, engineering and in all other areas, by developing each one within their area of interest and participating from there.

When you start to build a new society, people will be limited by the amount of goods there are. But once they start participating from their area of interest, you get to a point where everyone will have everything they need, and more. You get everyone to have all the goods they could want and need, *in abundance and not scarcity*.

This is the way to live in peace, presenting, all, everything they need to develop and be happy, enjoying this material universe and acting each one from their unique place. This is what we suggest you to do.

We care for you, and we will be supporting you with more ideas when the time comes to structure this new society that will allow you all to be happier, without having to go through such complicated situations. A happy future awaits you, and we will be happy to participate in helping you to shape it. You will have our assistance on your way.

The participation of children and older adults

SIRIAN INFORMATION...

In all advanced societies you see help and cooperation towards the others. This help is given from the heart, understanding that it will allow everyone to function in harmony; because, thanks to the support of all, everyone manages to be well. It is done to help everyone, from each individuality. So, among all, everyone manages to be well.

This harmony in terms of goods and services is achieved when each member of the society participates by contributing from his or her place, from what interests him most as a soul, following his soul interests. And that help that each one gives will allow everyone to have what they need to develop and be happy.

When an important group of the society does not participate contributing from its unique place, it can happen that not everyone will be able to have everything they need and want. Therefore, we must be conscious of the fact that *everyone must participate by contributing* so that this harmony in cooperation is achieved on a planet.

When a part of society is not able to participate by contributing due to health or other problems, then another part of the society must

substitute their tasks, when the work they do is essential for this harmony to continue —as would be the case of food or when working in agriculture. And these important jobs are substituted until that part of the society recovers or recovers its health.

The councils make it possible to find the right people, who have volunteered, to fill these necessary functions for the time needed.

It may also happen that not everyone cooperates due to health or age, such as older adults with physical difficulties and children. And in these cases, is appropriate to support them without asking them to contribute something to their society, but rather to support them with everything they need so that they can live well.

In the case of children, they are supported with the understanding that they haven't reached full maturity so that they can develop well, study and whatever they need to do to later contribute to their society from their area. But if they wish to participate by contributing to their community at an early age, their decision is always respected and they are allowed to contribute.

In this way, everyone is always taken care of, and everyone is always respected, every member of the society, as well as animals and nature, which contribute to their society from their place as well.

This is how you live in symbiosis with the planet and the other inhabitants. Unity allows everyone to be well, not just some. This is what we have advised and continue to advise you to do.

Once it is so, you will understand the importance of having united and the benefits it will bring you. It will bring you greater happiness and health also, as you develop freely in what you most desire to do,

without worrying about how you will survive, and without engaging in an activity just for the money—as is the case on Earth at present. It will bring the greatest happiness to you, knowing that whatever you need, you will have it, understanding that you will receive the support of others.

Thank you for receiving this message of help.

21

For a better future

SIRIAN INFORMATION...

When we form a new society, we always have to make sure that everyone has the most important things to live well and in peace. Those are the basic needs that we have already talked about.

Then we prioritize the other tasks to be carried out, which will have to do with the care of the planet, the seas, decontamination of the beaches, and everything related to cleaning the planet from the pollution it already has, which is quite a lot. So, the tasks are ordered to continue helping in that line.

And then you start worrying about other activities that will be related to allowing you and your families to have a better quality of life. These tasks can correspond to worrying about the supplies that each of you need, additional supplies that will allow you to enjoy life more. More variety of food —because you will have already taken care of the land— and other goods that you can share with each other.

After that, you will be able to contribute from your area of interest of the soul, as we have already indicated as well.

All the activities that you will have to perform will correspond to the fact that you, in the future, will be able to live better, with a better quality of life. It may be difficult for you to coordinate and carry out everything, but it is done considering that in your future it will allow you to live much better and develop in your areas of interest, being free, without oppressions or mandates from third parties, but being the free people that you really are.

You will be free from being governed by third parties, from being imposed by law to do something you don't want to do. And you will be able to guide your lives from your own hearts, in freedom and unity, as you should live in reality, with a good standard of living for all, without discriminating in social classes, races, borders or the animals, being all important participants of your society.

That is what this change of consciousness, education and society is for, so that you and your loved ones can enjoy life, united and happy, as it happens in the other advanced stellar societies that can be found in the universe.

The society will be built or structured by you, according to your own criteria, following, if you wish, some guidelines that we the stellars give you, so that the change can be carried out well, without major complications and quickly. You will have our guidance so that you know how to start, and we will support you by answering all the doubts you may have during the process, as a guide and support to you.

Each one of you will help during this process, and in this way it will be better for you to carry out all the changes.

We look forward to your success. We will be with you along the way, just as we are with you in the present, guiding you with love and caring for you.

22

The root cause of all evils

THANNEFA'S INFORMATION...

If we name the problems that our society presents, we will see that the “common denominator” is money. Money, as the main cause of the sickness of our society. Money as the cause of the cancer of our society.

- Corruption in politics
- Poverty
- The pharmaceutical business
- Inequality and social classes
- Family conflicts over inheritances
- Crime
- Prostitution
- Pedophilia
- Kidnapping of children for the sale of organs
- Scam
- Drug trafficking
- Hunger
- Not being able to receive health care

- Not being able to obtain a degree
- Not following vocation
- Survival
- Homelessness of people and animals
- Many of the suicides
- Staying with a partner you do not love
- Wars
- Job losses due to AI
- Etc.

If we eliminate money, all of the above is solved. Instead of trying to solve each of the above points—which is a never-ending story—, it would be more efficient and quicker to simply eliminate the money. Let's go to the cause, as one should do with a disease. Treat the cause and the disease disappears.

We do not need a strong hand to end crime, but we need to eliminate money, to give everyone everything they need to live well and develop in their areas of interest. Crime is the consequence; money is the cause.

We have been taught to cling to money, to make money our treasure, to give it value, to make our happiness depend on it, to make all our cells vibrate with the desire to obtain more. People want to learn to manifest money, when they fail to make money with money. And we are blind to all the problems it causes.

We have been led to believe that we will have more value as people if our economic situation is better. "I'm better than you because I have

a better car, a better house, a better job. Even my dog is nicer than yours. And I went on vacation to a better place than you...because of money." We have been led to believe that the more things we have, the better people we are.

And so we move away from what is truly important for our souls. We move away from our essence. We disconnect from the spirit. We disconnect from the other beings. And we question our choices and regret them when we are about to die, when it is too late. "I better reincarnate to have the opportunity to realize that what is truly valuable are the experiences, the beings with whom I share and the learnings I achieve as a soul".

On Earth, so many of the experiences we want to have with the people we love depend on money. Many of our dreams, or what we want to achieve, depend on whether or not we have money. What if there was a way for all of us to achieve our dreams without depending on money? Would you take it?

The stellar political system of *holographic society*—which is a system without money—gives everyone the opportunity to achieve their dreams. We just need to make the decision, unite and make the change.

In a society based on money, not everyone can work in what they like best; not everyone can follow their vocation. So you see people working only for the money they will receive. You see doctors without a vocation, who do not fulfill correctly a healer's work. You see corrupt politicians without a vocation for service. You see lawyers without a

vocation, engineers without a vocation etc. You see people accepting to be treated badly to keep their jobs. You see employees of others.

If we were to participate in a system without money, many people would change their occupation to do what they would most like to do and what they have skills in. And everyone would be happy; we would be a happy society. In addition, we would see an important cultural and artistic development, which enriches a civilization.

People's contribution would be valued equally. And there would be no social classes, no inequality. There would not be some living well and others living badly. There would not be some taking vacations and others not. It would not be unfair.

The current system is unfair, because people's work is not valued equally. Some earn more money than others per hour of work, and that should not be the case. Why are some valued more than others, if they are all working?

Also, people are valued according to their work, and that shouldn't be the case either. Why would someone who helps clean be any less valuable than a lawyer? We are all valuable people and we all contribute something essential to our society. Everyone's commitment should be valued equally.

In a society without money, people's contributions are distributed equitably. The more people contribute, the greater the variety and abundance. The system of tiered councils makes it possible to distribute inputs on a planetary level, without differences between the sectors.

Supply drop-off centers are created —like free malls— where people go to look for what they need. And if they don't find something

they want, they ask the local council to get it for them. This way everyone has what they need to live well and develop in their areas of interest.

Whatever people can contribute is given to the local council, so that the councils are in charge of distributing it to the corresponding supply centers.

23

Voting system

THANNEFA'S INFORMATION...

It is curious to know that the advanced star races do not use the voting system to decide on anything. They do not use it to elect their representatives or to decide what will be implemented. They consider it an old system that does not allow to integrate them all.

If someone wishes to participate in politics, they simply do so, without asking anyone's permission. Everyone is free to participate by contributing to their community from the place they prefer the most.

And when they need to solve something, they don't do it by voting, they talk about it until they come up with the best solution. Everyone is expected to agree before implementing something, such as a new law, an aid or intervention etc.

This is how the councils of a *holographic society* participate. When a council needs to resolve something for its sector, they talk among all the council members until they all agree. If they cannot reach a collective agreement, they escalate the problem to the next council to take care of.

Among all, they try to solve the situation. Everyone participates in helping to find the best way. They do not participate by defending their own position, indicating that they are right. Solutions are offered and discussed. And the path to follow is chosen by all. The information that everyone can contribute is listened to, in order to arrive at the best possible solution.

This is an advanced way to solve a problem presented by a community. If voting is used, there will always be a group that will not agree, or it may happen that the best option is not voted for.

Let's look at this example to make it clearer:

If you were to participate in a group that had to choose the next Nobel Prize in literature, you wouldn't choose him or her by voting, would you? You would discuss among all of you who deserves it more, or who has more merit.

The best way forward will not always be the easiest or quickest. You have to look for the most correct ways to act, even if it takes more time. This is how it is done in an advanced society; you take the necessary time to find the best solutions, you don't use voting.

Citizen voting can be used, for example, to let the planetary council know the preferences of the people it represents. The planetary council can implement a *voluntary and open* voting system, with the option of comments, to know the preferences and opinions of the people. Open voting will ensure transparency, because everyone will be able to see their vote, and will be able to see the comments and contributions of others.

But what is voted by the majority will not be implemented, but rather the best path that has been decided. The agreement that has been reached will be implemented. So, the voting system will be, rather, a first step to know everyone's opinion. And, as a second step or stage, the best way forward will be decided.

In a political system of *holographic society* everyone can participate as a member on any of the councils—including the planetary council—, without the need to win an election; that is, voting is not used. Nor is prior experience in politics necessary.

It is expected that there will be a minimum and maximum number of adults for each council, in order for it to function properly. So, if there are more council members than the ideal maximum, that council will be rotated to give everyone the option to participate—or people can move to another council that has fewer council members. And if there are fewer council members than the minimum allowed, a call will be made to the citizens to participate.

Reaching agreements

SIRIAN INFORMATION...

In a well-formed society you will see people reaching agreements to solve a problem. Whenever agreements are reached, people will be able to take an action that will benefit that community. Agreements allow people to find a solution to a problem that needs to be solved.

Any well-formed society will be guided by what all its members decide, it will act according to what all have decided to do. Thus, only what everyone wants to do will be done, and no one will be forced to do something they do not want to do or do what some do not want.

In societies it is appropriate to act according to what is decided among all, because in this way the opinion and desire of all members of society will be integrated. Thus you participate in unity, acting according to the wishes of all.

All well-structured societies will have the participation of people who will help in the decision making of the different sectors. These people will help to ensure that, within their sector, the best decisions are made that will benefit people. Therefore, agreements are reached between these people so that something positive is implemented that

will favor the sector. This ensures that people are well and are favored by the measures that are taken together.

Then, actions are taken according to what is decided as a group. Help is given, among all, to contribute with ideas that will help to reach a collective agreement. In this way, group agreements are reached, to then implement whatever is desired to be implemented in that society. Thus, this society grows and benefits according to what has been decided as the best way in each situation.

All those who wish to participate, will participate arriving at the best solutions. In this way you move forward together without having a single leader, but being *all* free or voluntary leaders who will participate in solving the problems presented by the community.

These people are usually people with extensive knowledge and criteria, to support others with their words. They are people who help to solve the most important problems presented by a group, so they participate consciously, thinking about others, on how they will be better off.

It is done for the others, with no personal benefit other than the pleasure of helping. It is done so that the others may feel better; it is done so that everyone may be well. This is how those of us who help here participate, from the heart, trying and hoping that others will feel better.

We hope that together you succeed, that among all you manage to reach the solutions that will allow you to participate in a united community that has a good standard of living, where people participate by helping each other to advance, and taking care of each other.

We hope that during these years you are able to advance in consciousness to treat each other well, that you unite and manage to organize yourselves to make all the changes you need to make to live in a happier and more united community, being all participants in the change.

We greet you from our ships. With love, the Sirians.

The constitution and use of laws

THANNEFA'S INFORMATION...

An advanced society will not function by imposing laws on its inhabitants, because imposing a law means going against the free will or free decision of the people. In an advanced society, people's freedom is not violated, but on the contrary, they are encouraged to participate according to what each one decides from their heart.

Imposing something on someone, or on a group of people, goes against freedom, which is a fundamental principle within advanced stellar societies. To impose a law is to be dictatorial, and does not respect the personal decisions that people make, as autonomous and free people that they are in reality. As Akashic Records say: no law will be above the free will of people.

The constitution, which is considered the fundamental law of a state, rather than framing or limiting the actions of individuals, should rather be a description of how that civilization acts according to its values and ways of being. A constitution should show how that civilization acts —what enables its good development—, rather than how it should act. A constitution highlights the values of that civilization,

explains how it participates with others, is a portrait of that society, of its ethical principles.

Advanced stellar societies participate according to what is decided to be best in each situation, with the guidance of persons with criteria. Their laws are dynamic, and they remain open to eliminate them, change them and improve them always.

What they usually do is reach agreements. If they need to solve something, or decide on something, they talk about it until everyone agrees. If one party disagrees, they keep talking until everyone agrees. This way, everyone is integrated, and the best possible solution is reached.

What is indicated to me from etheric planes, is that you can do what the majority asks for and not what everyone decides, when it is clear that a group is not collaborating to reach solutions. This way the progress of that community is not delayed.

In an advanced society, in my opinion, there should not be laws, but a constitution portraying how that society participates, and guidelines of good conduct taught and encouraged by those who run politics. That way, free will is respected and it is not dictatorial.

In an advanced society, a person's freedom of action is respected, as long as they do not go against the freedom of others, or against the life of others. Or as long as they do not harm others, nature and animals, with their actions. Their freedom is respected, as long as they follow the values written in the constitution of the state. Otherwise, for the safety of others, people can go against their freedom and imprison them.

The death penalty is not allowed in an advanced society for going against life. It is only allowed to go against the life of another, in case of needing to defend oneself or others. It is allowed to do a harm when it is in self-defense. And there is no karma, for being justified.

In an advanced society, rather than following laws —laws that may oppress and go against the freedom of others—, guidelines of good conduct will be followed, in order to participate without harming others. Good treatment among all will be encouraged; to be a positive contribution to that society. Unity and respect will be encouraged. The best ways to live together in harmony will be taught. People will be encouraged to help others. They will be encouraged to be autonomous in making their own decisions and to be responsible for them.

In an advanced society the freedom of its citizens will be encouraged to follow their hearts and contribute in that unique way to their society, being who they are and following their tastes. Encouraging freedom in people allows them to develop in the areas of interest of the soul, allows souls to develop according to what they chose to do before incarnating. It allows the development of skills.

Gifts are abilities developed by souls throughout their incarnations. Therefore, in an advanced society, which participates by encouraging freedom in its inhabitants, many gifts and abilities will be seen in its citizens, which will enrich that civilization and will allow its evolution.

A society will evolve thanks to the individual development of people and their personal contribution. And for that, they need to be free and supported by their community.

On Earth, through the imposition of laws created by a few, the basic principles of freedom are violated. Laws are used as a way to control the population and guide it according to the interests of those in power.

It is dictatorship whenever a law is imposed on others —not only when a person takes command in a state without the approval of its citizens. If a law is imposed on others, it is dictatorship. In an advanced civilization, no one is forced to do something they do not want to do; freedom in choosing their paths is respected.

All important decisions made in politics will have to go through the approval of the citizens. If you want to implement something that will directly affect the people, you must ask them whether they agree or not. If it will affect the citizens, then the citizens have to be aware and choose what they want, so that it can be implemented by those who participate in politics.

Politicians will not decide on their own or for others, but will serve the desires of their community. Citizens will not follow what politicians impose, but rather politicians will follow the wishes of the citizens.

This is advanced politics, and one that will work well, for the benefit of the people.

26

Justice system

THANNEFA'S INFORMATION...

In a political system of *holographic society*, there is no need for a justice system, since the council members themselves, when making decisions in their sector, can decide what measures to take in the judicial area.

Just as there is no need for ministries —such as the ministry of transportation, ministry of education etc. It is the councils that will act to help their sector in all areas, making the decisions that need to be made for the good of the people they represent. The council members are the ones who make decisions as a group for their sector, escalating to a higher council what they do not want to solve or what they were unable to solve.

If the members of a council lack essential information to make a good decision, they can call in experts in the area to participate in the meetings and help them with the missing information to be able to advance.

The main role of the councils and council members would then be to solve the problems of their sector, whatever they may be. Therefore,

there is no need for ministries, justice systems or other external agencies.

We must also understand that, in an ideal system of life —without money, cooperative and non-competitive—, there are no crimes to prosecute, because everyone lives well, happily and peacefully. Everyone takes care of each other. Threats come, rather, from outside the planet. In general, advanced star races do not have prisons.

I do see it convenient to keep at least 1 prison on Earth in case of need (I would maintain the ugliest prison), because there are regressive races that could try to harm us. Also, we will need to imprison the Cabal members remaining with us for the time of Earth's liberation. That could be the last time the judicial system is occupied, to prosecute them for all their crimes, making clear all the damage they have done to humanity, and making the gavel bang loudly.

There will be no death penalty, for the reason I mentioned earlier: it is not right to go against the life of another, unless it is in self-defense or to defend others; then you are not responsible for that death and you do not gather karma. But they can be imprisoned for an indefinite period of time.

When you have contact with other star races, you sign agreements or pacts between the races to organize how they will participate with each other... “You help us with this, and we help you with that.” “You want something from our planet, what can you offer us in return.” So you do enter into agreements legally between the races, and this can involve lawyers and legal representatives, who will be the people who like that area the best.

Making agreements between the races is similar to what is done in the soul plan, where you write down how you will participate with others, what you will allow and what you will not allow, as a way of taking care of the souls. And if someone breaks those agreements, there are karmic consequences. Within the material world, it would be legal consequences.

But there is no need to create laws for the members of the same society, when that society is advanced in consciousness. Because everyone *knows* what is right and what is wrong; they do not need to indicate it through laws or commandments. Everyone already understands that others should be treated with respect and that in essence we are one. Then each one acts well, because it is what they decide to do, because it is the right thing to do from their point of view.

So I would eliminate all laws on Earth, when we make the changes. I have faith in the new humanity. Just as there are no universal laws, because the freedom of souls is respected, there should be no laws in an advanced society. That is my opinion.

Everything can be organized within the planetary constitution. In it, it can be specified how that society acts, which allows it to function in harmony, as I have already mentioned. And let it be a guide for that society and the councils.

A constitution should be beautiful, almost like an anthem of which people are proud; not a big book of laws with which society is crushed.

Another role of the planetary council —as people with advanced consciousness— is to infuse values in the people it represents. It will review information of consciousness in that society, it will remember

the importance of good treatment among all, it will encourage unity and cooperation, it will educate the people. In other words, it will do the opposite of what the Cabal is doing with us today.

This helps a society to function in harmony without laws, each one being free in their actions. Following what their heart dictates and not what others dictate.

When violence is allowed

SIRIAN INFORMATION...

In an advanced society, violence is not allowed in general, only in very specific cases where a defense by the state is required.

Then it will only be allowed on very specific occasions where it is required to defend the population from external threats that are not part of our societies. Because in the societies in which we participate, all members are protected so that all are well and present the right conditions to live well and be happy.

In an advanced society peace is encouraged, because it is a reflection of the inner state of the people who live together in a community, the inner peace. A good coexistence will always be encouraged in all areas in which people participate, the mutual respect among all its members, the respect towards nature and animals, the respect towards oneself.

We participate in equality, seeing the other as a being identical to you in their essence. Because we are all part of the same creative Source, which is the place where we come from. We see everyone with respect and help them in whatever they need.

However, you will always see that advanced societies present defense from the state, with warriors, weapons, and starships adapted to fight if necessary. Because it is understood that we might also require defense—which is something that has happened to us before.

You will always see us well armed in terms of defense of the state, to participate in helping the members of our communities if necessary. So, there will always be defense.

But in general, we are races quite advanced in consciousness, where we only use violence for defense, and not to seek conflict with others or other races outside our own. We do not participate in confrontation with other races outside our communities, but we participate in mutual help and understanding, to achieve a good coexistence.

This is how we participate. And we hope that in the future you will be able to see each other as the family you are, and participate among yourselves with love and without hurting each other, as we consider it unnecessary.

It is part of the growth process of a society. Societies are advanced once they understand the respect and good treatment of others. Not with violence, not who has better weapons. Who is more advanced, in this case, is the one who manages to see others as their equals, which is what we are in essence, souls of similar characteristics participating together in a scenario such as an incarnation.

Everyone will participate according to their tastes and evolutionary level. And it is hoped that we, the souls, can advance enough to treat each other with respect and not hurt each other. This is the example

we want to give you as a race, to treat each other with love and respect, and to take care of all.

We know you can do it, united, and make the change in society together, without hurting each other. We hope that together you achieve it.

28

State defense

THANNEFA'S INFORMATION...

As the Sirians explained in the previous chapter, civilizations do need a defense of the state, to participate in defending the planet and its inhabitants. So it is okay to “arm yourself to the teeth” to defend, with everything you have, the inhabitants of the planet.

Stellar civilizations, advanced in consciousness, do use weapons. They have warriors, fighter pilots, and whatever else is needed to support their society.

Some races are more warlike than others. But being a warrior is not a bad thing, when you participate in defending others. Not by seeking conflict, but by defending the most defenseless from the threats of regressive races, which there are also. If there were no regressive races, there would be no need for defense.

The human race is currently considered a regressive race that participates in harming others.

When we make the change of society, we will need to organize well a defense system, to defend ourselves from external threats, where all those willing to support in that area will participate.

Education

THANNEFA'S INFORMATION...

The people who participate in advanced civilizations are all self-taught. Each one is concerned with advancing in knowledge, with organizing their time for study. Each one chooses what subjects to study, subjects that will help them develop in their area of interest. Each one chooses which subjects to study with a teacher or expert in the area, and which subjects to study on one's own. Each one occupies part of their time in growing in knowledge continuously, throughout their life, because there is always more to learn.

You don't study to get a degree, and then stop studying. A degree that supposedly guarantees that you already know about the subject. On Earth, anyone with enough money can get a degree. The degree does not guarantee knowledge, but the person's way of being.

Each one should choose, following their own heart, in which areas they wish to develop and contribute to their society. And each one will choose according to who they are as a soul, according to their history and the skills they have developed throughout their lives. So each one is expected to direct their learning according to who they are as a soul,

and thus contribute to their society. Each one, following their tastes as a soul, chooses what to study.

In advanced civilizations no one is forced to do something they don't want to do; no one's freedom is infringed. That means that no one is forced to study subjects they don't want to study, not even basic subjects like mathematics. And yet everyone understands basic subjects like math, language and survival skills, because they see them as necessary to learn. They are also taught by their parents as they grow up.

The same society will offer course options, both online or digital, as well as workshops or face-to-face classes. There will be people who will participate as teachers or mentors, others who will help digitize the courses. Researchers will upload their studies for all to access. People will be able to choose to study with books or ebooks, depending on how they like it best. Practical classes will be offered for those interested. Videos will be made teaching the subjects.

And all of this is organized in an easy-to-access digital platform, so that you can register for courses and workshops in person, and access information online.

Some will be interested in developing and contributing to their society through several areas, not just one—for example, being a musician, making soaps and being a member of a council. And it can be done that way too. Many souls have several interests and develop several of them, thus contributing in several areas to their community. It will depend on what each soul wants to do. Or they can be interested in one area and then change areas, at any age, without being limited by age or money.

In this way, people are free, and they are continuously learning and developing. And in this way, from their personal area of development, they contribute to their community.

30

Health

THANNEFA'S INFORMATION...

An ideal health system will offer people a wide variety of natural medicine, which they can access freely according to what they feel they need to improve. This medicine, being natural, does not harm the organism nor does the body reject it, and they will be able to take it with them or leave it at home.

If people need additional help from healers, or additional treatments, they can schedule a face-to-face appointment at health centers or at the place where the healer attends. The therapy to be followed will be the one chosen by the patient, according to their personal preferences. Therefore, all existing healing therapies will be offered. It is the patient who will choose their treatment, because there will always be several ways to achieve health.

All treatments offered will be in favor of people's lives. If a treatment is seen to harm the body, it will not be implemented as a health treatment. The same goes for medicine: if a medicine harms the body, then it will not be offered as medicine, nor will it fall into the category of medicine. Likewise, if a treatment harms part of the population,

then it will not be implemented as a treatment. *Only that which is healthy will be offered as medicine and treatment.*

Healers who know about natural medicine can give their patients a medicine prepared for their particular case, with indications for use. Or they can apply a treatment with natural medicines during the healing session. Or do both; it depends on the case.

All advanced star societies use natural medicine, because it is efficient and does not harm the body. None of them use synthetic medicine that can harm the body. They know how to use natural medicine so that it is efficient. In some cases, they work with toxins from poisonous plants that generate a chain reaction in the body that drives it to heal, that does not damage the body's systems.

They also occupy energetic therapies, being, we, energetic beings in the first place; and the rest of the therapies that the community can offer. So there are no “alternative therapies”, they are all therapies, period; they are all valid ways to heal. They will all help in some way.

Also, the star societies use advanced technology in medicine. They have several regeneration chambers that fulfill different functions, with which they help people to regenerate the body or parts of the body, mainly when they have suffered accidents.

Then, no prosthesis or screws are used. Technology helps the person to regenerate 100% of the damaged part of the body. Which is a technology that we already have on Earth, but (guess what) it is hidden from us. They also use it to rejuvenate a person to the age of a young adult.

They are accompanied by technology to diagnose, to make a general check-up of the body, to eliminate physical pain etc. Technology is used as a support for healers in health.

What usually exists in advanced stellar societies are *healing centers*. There are no morgue-hospitals, infested with astral parasites. There are healing centers, spa-like, surrounded by nature, with healthy food, where people happily go to recover their health, where several specialists or healers with vocation attend.

There are also ship-ambulances that quickly support people in case of an accident. So there will always be rescue, or people on duty day and night, to support if necessary. Because the lives of people and animals are a priority.

Animals that have been hit are not removed from the streets with shovels. Animals are prevented from circulating in traffic areas, and are rescued immediately if one of them suffers an accident, having the same priority as any other person. Ambulances are also for animals. There is no discrimination based on race.

Healers, generally, know how to help animals as well, because there is not much difference, besides weight and size.

There will always be specialists or people who are more expert in one area, which is the area they like the most. But, in general, all healers know about everything in relation to the body, because each part interacts with the others and the body has to be seen in an integral way—considering, also, the emotions, lifestyles and history of the patients.

And you look for and treat the cause of the disease. You don't just regenerate the body with technology, because the disease can come back, or it can trigger another disease, if you don't treat the cause.

Then you always look for the cause or causes, and work on them, being *the person* the leader in their recovery, doing their part, taking care of themselves accordingly, *choosing* the treatments to follow, being consistent with healthy routines, listening to their body and soul, until they achieve recovery. Being the person who healed him or herself, with the guidance and support of healers. Being the person responsible for their life and health.

Patients, in an ideal health center, need only give their name, so that a record can be kept and they can be identified. They do not need to give any other information, or be identified with a number, nor do they need to sign a pile of papers. Because no one is controlled, nor do they have to pay to be treated.

Health paperwork is designed to get the patient to pay, or to make it clear that they have to pay or else there will be consequences. So they ask you for all the information they can ask for. And if you can't afford to pay... "God help you, because the hospital won't. We care more about your money than your health. If you can't pay, go to work and sick. We don't care about you."

In an ideal healthcare system, healthcare will always be free; it will not be tied to financial means. There would be no discrimination based on race. And care will be prioritized according to the health urgency of people and animals. Understanding that there will always be more health specialists than sick people; attending, even among several

health specialists, the patients. Because in an ideal society people get sick very little.

Identification number

THANNEFA'S INFORMATION...

Giving an identification number to people and animals will always be a form of control. Cattle are ear-tagged to identify them or, for the less fortunate, their buttocks are burned with hot iron... Against their will, and corresponds to animal abuse.

In the same way, people, in all countries, are given an identification number so that they can participate in civilization. Without that number, you can't do anything. And, thanks to that number, the controllers can identify you and follow you wherever you go.

That goes against the freedom of people and animals, and is not used in advanced civilizations. Cattle are not branded; prisoners are not branded.

In a free civilization, each one will participate according to the name given to them by their parents —a name chosen by the souls, before incarnating, according to its meaning. And they can change it simply by giving notice. They will not use surnames that they may not like or identify them.

Surnames are also a form of identification on Earth, and correspond to a form of control.

Putting cameras everywhere is also a form of control. It is control in the first place, and security in the second place.

The fingerprint is control. The ID card and passport are control. The signature is control; the stamp is control. Having to give the photo of your face to the bank is control. Giving your iris is control. The chip is control. Civil marriage is control.

My question to you is: how free do you want to be as a society? Do you want to remain within a system that controls others? Do you want to be moderately free (mediocrely free)? Do you want to be completely free?

I know that those of us who are awake prefer the latter option, and that is the path I am offering to you.

Plan of action

THANNEFA'S INFORMATION...

According to what the Sirians and Arcturians explain to us, our plan of action would be more or less the following....

1. Formation of the councils.

The planetary council is formed with those who have volunteered. The council members of the planetary council choose where their central office will be located. The planetary council designs the sectors to be covered by the other councils, according to population density. A digital platform is created with the councils, so that people can register as council members.

2. We make sure that everyone has the basics to live.

It will depend on what we are experiencing at the time and the current economy. But one way could be to create free supply centers so that people can go and get what they need —food, water, hygiene supplies etc. That way no one will lack the essentials. If someone can't pay their bills, they ask their local council for help.

3. The list is made.

The planetary council makes a list of the tasks to be done, with the information provided by the other councils and the people in their sectors. It orders the tasks according to their urgency.

4. We carry out the tasks on the list.

The planetary council assigns the tasks to each council, in order of urgency. The councils are in charge of organizing the people in their sector who will participate in carrying out these tasks. Those who have essential jobs, linked to housing, health, food and transportation, continue to do the same. The others participate by helping with the tasks on the list.

- A. The basic needs of people and animal species are fully resolved.
- B. We continue with the rest of the existing needs. The planet is cleaned up, and everything that pollutes and harms us is eliminated.
- C. We finish organizing our new system of life, with a new constitution.

5. People start to participate from their area of interest.

At this stage, money is completely eliminated—if we have not eliminated it before. In an organized way, people start to participate from their area of interest, requesting what they need to develop well and giving their contribution. We achieve a greater variety and abundance of goods and services. The councils are reassembled with the people interested in participating. We finish building the new digital platform that we will use as humanity.

6. The years of change are over.

33

Digital platforms

THANNEFA'S INFORMATION...

The Sirians tell me that they use *digital platforms* where all the information that people will need is contained. So, for *the years of the change*—which is when we will make all the changes on Earth—, we could have a digital platform where each council writes what it is working on, for the knowledge of all the councils and the population, giving the option to each council to edit its section.

There would be an illustration of the areas that each council would cover, the name of each council, the names of the council members who are participating, the address of the council, the email and phone number of each council to communicate directly with them —the phone number for the most urgent matters only.

The councils would also participate, through this platform, by calling for volunteers for the different tasks to be performed.

In addition, here could be published *the list* with the tasks to be done, of the planetary council, indicating with green color those that have already been completed. When they are all in **green**, we would finish the years of the change.

In parallel, we could have a digital platform that we would maintain as humanity. A digital platform for all, made by all. I will go into details here, but it is open to change...

At the top of the home page could be the AI assistance option, a search engine, and access to a map to find input centers and other locations —editable by people.

The home page would be led and edited by the planetary council, and people would be asked to check it frequently. It would contain the following options:

- Calls to participate as volunteers in works that need to be done.
- Digital voting with the option of comments, to know people's opinions.
- Consciousness raising videos, reinforcing important topics, to educate society with values.
- The key activities being worked on at the planetary level.
- Notices if something serious happened, indicating the measures taken, how to avoid it in the future etc.
- Calls to register and participate in olympiads, dance contests and other sports activities.
- Cultural presentations, ordered by date.
- The councils and areas they cover, their names, contact and members, if they are closed, and the activities they are carrying out.

At the bottom of this home page, there could be 3 categories to select from: education, health and culture, which would lead to digital platforms where people would upload their information. These

platforms would have filters to make it easier to find what you are looking for.

Education: It would contain all the information related to education. People could sign up for courses, classes, workshops, conferences, etc. They could access all the education information that people, teachers, researchers etc. would upload. Documentaries would be uploaded here as well.

Health: It would contain all the information related to health. The profiles of the healers, the therapies they offer, the place where they attend, the hours available and the option to make an appointment. Health centers and emergency centers. Animal species care is included. Also, sports classes such as yoga, tai-chi, swimming etc, with the option to sign up.

Culture: It would contain all the information related to culture. Cultural activities that can be attended, such as exhibitions, plays, concerts, shows, restaurants, sports competitions etc, with the option to reserve a spot. Books to read (non-educational), music to listen to, movies and series to watch.

The idea is to keep everything tidy and easy to access.

These platforms would have the option to be translated into other languages. But it is hoped that we will all be able to speak the same language in order to communicate better. We could agree to speak English, which is a relatively easy language to learn. The other languages could always be maintained, if desired.

Among the star races they agreed to speak andromedan, which is the language of the Andromedan race. And they communicate mainly

in that language between the races. Language that we will have to learn also, when we are an interstellar race.

34

In unity

KARISTUS INFORMATION...

Always, in an advanced society, everyone will be seen to have the ideal conditions to develop well in their areas of interest. They will always be seen happy and calm, making a special contribution to their community from their hearts. All of them will be seen living in good conditions. They will be seen sharing happily, united, respecting each other and taking care of each other.

So, always in advanced societies you will see a unity among people, where they take care and protect each other so that all are well. And we hope that you will be able to participate in that way with others, that you will be able to see yourselves as equals and as siblings, that you will be able to participate united in favor of your society.

The civilizations that present these qualities usually get ahead, and develop and evolve correctly. They tend to advance in their development of technology and consciousness. That society tends to advance.

So, in order for you too to advance as a civilization, you must unite, rather than opt for separation and isolation. You must participate for others, so that all may be well.

Thus, if a society moves forward, it will happen because all its members participated in helping that community to move forward. It will happen because everyone helped others to be well. It will happen because it was so decided by all those who participate in that society.

An advanced civilization will always exhibit those qualities we named above. They will always be seen developing freely and acting from their heart with others so that all may be well.

We hope that you see the worth of what we teach you as values, that you can apply them and thus know which paths are best to take so that you can successfully change your society.

We hope, all of us, that you will unite and make this change in society so that everyone will be better off and happy. If you do it together, it will not be difficult to achieve, because you will support each other and help each other.

We ask you this, your brothers the Karistus, so that you may feel better. We ask it from the bottom of our hearts.

We bid you farewell.

The key to emerge as a society

SIRIAN INFORMATION...

In a well-formed society you will always see people participating through the activities they enjoy the most, and so they develop in the areas they are most interested in as a soul and are happy doing what they enjoy doing the most.

So a society is expected to function in this way, following the interests of the people in it. They are expected to follow their tastes, to follow their hearts, to be happier.

That is what is expected of you, that you manage to reach a point where everyone is free and do what interests you the most, so that you can develop in your areas of interest and achieve happiness.

In a society, people will always be happy when they are given the freedom to create their own projects, which they will then develop in their own way and at their own pace, thus allowing them to help their society from what they choose, from what they want.

All societies that remain united give each of their members the freedom to develop as they choose. In this way they all achieve an important individual development. And also a cultural development is

achieved, of the arts, where each one will contribute with their creativity and unique style, which will enrich that civilization.

Therefore, we suggest you to achieve that, allowing everyone to be who they are in their essence, allowing everyone to choose their area of development from their own hearts; not imposing them to do something, but supporting them in what they decide to do. That is the key for you to emerge as a society.

Everyone can contribute something particular that will allow the society to move forward and flow well, encompassing all the areas that exist, so that all the tasks that need to be completed can be completed.

This is how you participate in a united society, where you support others and follow their personal preferences, allowing them to be who they truly are, so that they can be themselves and not what others expect them to be. This is the way to live happily and peacefully, in the company of others you love so that you can accompany and share together.

We hope that during these years you will achieve a change in your hearts, which will be reflected as a change in your society. It is important to support everyone, so that everyone will be well.

We wish you and your families all the best, and much happiness.

Farewell, the Sirians.

www.thannefa.org/en
